Armando Meza

Full-Stack Software Developer

(+505) 7766-5604 | armandomzlp@gmail.com | amezal | armando-meza | amezal.com

Profile

Full-stack software developer focused on product engineering, performance, integrations, and internal tools. Strong with TypeScript, JavaScript, Ruby on Rails, Python, React, Ember, Angular, SQL, and cloud-backed workflows.

Experience

Full-Stack Software Developer Protiv 07/2024 - Present

- Shipped many features across production web, admin, backend, and mobile codebases using Rails, TypeScript, Ember, React, Python, SQL, and integration services
- Built payroll, job costing, budgeting, reporting, onboarding, billing, and in-app messaging features for a construction workforce SaaS platform
- Improved backend query performance with direct SQL, targeted indexes, and API response tuning, including one production lookup reduced from about 111 ms to 4.5 ms
- Reworked time-based job filtering and sorting, reducing average filter time from about 14.4 s to 2.9 s and filter-plus-sort time from about 8.3 s to 3.0 s
- Delivered third-party integrations and sync workflows for field service, accounting, and time-tracking systems, including admin settings, API flows, imports, and production bug fixes

Software Developer OOQIA 10/2022 - 07/2024

- Led architecture, stack selection, CI/CD setup, code reviews, mentoring, and implementation across multiple client projects
- Maintained a virtual tour platform with Angular, Azure Functions, and Azure services, shipping features, fixing critical bugs, updating dependencies, and improving documentation
- Reduced build and release times by about 50% through pipeline optimization
- Built WordPress sites, e-commerce features, custom plugins, API integrations, and AI-assisted content/image analysis tools with Ollama, Azure OpenAI, and LangChain

Developer Intern A.G. Software 07/2022 - 10/2022

- Delivered features, bug fixes, and automated integration tests for a Ruby on Rails ERP system, using Dockerized parallel test runs

Volunteer Web Developer Emprende Program 02/2022 - 09/2022

- Built a WordPress-backed headless CMS website and managed hosting, domains, and CI/CD workflows

Education

Universidad Centroamericana Nicaragua
Information Systems Engineering 2021 - 2023
Universidad American College Nicaragua
Information Systems Engineering 2024 - Present

Awards and Honors

Academic Excellence, Universidad Centroamericana 2021 - 2022

Skills

Programming Languages: JavaScript, TypeScript, Ruby, Python, PHP, HTML5, CSS3, SASS, SQL, Bash
Frameworks and Libraries: Ruby on Rails, React, Ember, Angular, Vue, Nuxt, Express.js, Azure Functions, WordPress, TailwindCSS, Mongoose, LangChain
Databases: PostgreSQL, MySQL, MongoDB, SQL Server
Tools and Platforms: Git, GitHub, Docker, Linux, WSL2, npm, yarn, pnpm, bun, Vite, Webpack, Azure Cloud, Azure DevOps, Netlify, Heroku, Stripe, Odoo, Ollama, Azure OpenAI, OpenAI
Languages: Spanish (native), English (advanced)
